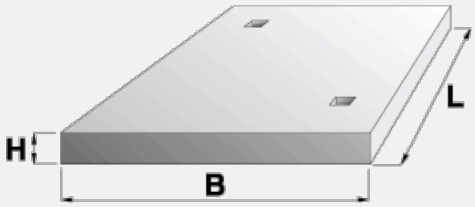
Road panel 300/120/15

61 Uherský Ostroh



Trademark	Dimensions (cm)			Concrete Class	Volume (m3)	Weight (kg)
	L	B	H			
IZD 02/19	300	120	15	C 25/30-XF1	0,5380	1270

Usage:

For temporary site roads, concrete areas, parking places and the like. These panels are intended for disposability.
The panels are applicable for a traffic load by design axle 100 kN and with passage number less than 1.0 x 104.
The minimum thickness of base course arises from the modulus of elasticity of subgrade 20 (30, 45) MPa, at load-bearing capacity of the subgrade characterized by modulus of subgrade reaction k = 60 (90, 120) MN/cu. m and is given in the type document.
„Reinforced Concrete Panels for Temporary Roads“ issued by Study and Standardization Institute in 1991.
